Sheriff Josephson and County Attorney Parry of Box Elder county were in the city today and took charge of Hobson. He will be brought back to Weber country after his arraignment for safe keeping. A curious circumstance developed in the case tonight. On the way north Hobson volunteered to take the officers to the scene of the crime. He did so, and it was discovered that it was one mile north of the Box Elder county line, or, in other words, in Cache county. In view of this rect. Instead of detaining the man at Brigham he was brought to Ogden, and Sheriff Eigby of Cache county was notified. The man is here subject to his orders. This takes the case out of the hands of Sheriff Josephson, and Hobson will have to be arraigned before the Justice of the Poace at Logan.

George Austin, general agricultural superintendent of the Utah Sugar company, says, for the main mill, the crop will be even greater than was estimated before the farmers began digging. At Lehi 14,000 tons have been delivered from an acreage of 1000. The sugar percentage is satisfactory and the farmers have taken pains, as a rule, to deliver their beets in good condition. About all the crop is now up and the bins at the different stations are filled to the top. At Lehi there is on the ground, in one pile, about 5000 tons of beets about 5000 tons in a pile on the ground in Provo, and about 15,000 tons in one pile at Spanish Fork cutting stations. He says that this year has been a good scason for the Utah Sugar company, both at Lehi and at Garland. At Garland an estimate of 30,000 tons was made before the crop was delivered and it has now overrun the estimate between 1000 and 2000 tons. The outlook is for a 40 per cent increase in the acreage in the Bear River valley for the next season.

Contagious Blood Poison, sometimes known as "THE BAD DISEASE," begins usually with a little pimple or sore, and this may be the only external evidence for several weeks; but soon the glands in the neck and groins

swell, pimples and red eruptions break out on the breast and other parts of the body, the mouth and throat get

sore, the tongue heavily coated, the hair falls out, and as the contamination more thoroughly saturates the

system, copper-colored spots and other severe symptoms make their appearance. Too often the sufferer turns to

the Mercury and Potash treatment and smothers and hides the disease in the system, and when they are left off he

finds that this masking of the disease has concentrated its strength, and it breaks forth again with consuming

intensity. Mercury and Potash not only fail to cure Blood Poison, but produce other severe troubles such as Mer
